Cisco Networking Essentials
CISCO · FEBRUARY 2022

Windows Server 2019 Administration
ITPROTV · FEBRUARY 2022

PowerShell Basics
ITPROTV · FEBRUARY 2022

SUMMARY

Founder of Fuelo, a fuel-price app for Greece, and CTO / Lead Engineer at Extratzis, a Greek marketplace for short-term work. Previously led a team at Datawise Data Engineering (Atlanta) that built Python tasks to evaluate and benchmark AI models. Background in PHP and Python backends plus the years of network troubleshooting that taught me where things actually break.

EXPERIENCE

Founder
2026 – PRESENT
Fuelo
GREECE

- Founded and built a fuel-price app for Greece on official Fuel Price Observatory data: trends, route costs, price alerts, fuel log
- Ship a bilingual (EN/EL) web product with a freemium plan structure; iOS and Android apps in development

CTO / Lead Engineer
2026 – PRESENT
Extratzis
ILION, ATTICA

- Lead engineering for a Greek marketplace for short-term and on-demand work across iOS, Android and web
- Own architecture, delivery process and technical hiring

Software Engineer (Python)
SEP 2025 – JUL 2026
Datawise Data Engineering LLC
ATLANTA, GA

- Led a team designing Python tasks that benchmarked how AI models reason, code, and execute
- Architected containerized eval environments and the review workflow that kept task quality consistent

Software Engineer / Web Developer
MAR 2024 – JUN 2025
BRDY Wireless Broadband

- Built and maintained PHP/MySQL backend systems; tuned queries and API integrations for daily ops
- Rolled out features cross-functionally and hardened reliability of an inherited codebase

EARLIER EXPERIENCE

Technical Support Engineer, BRDY Wireless Broadband — Sep 2023 – Sep 2024
Technical Support Engineer, BigBlu Broadband PLC — Mar 2023 – Sep 2023
Technical Support Engineer, Nova Telecommunications MAE — Oct 2021 – Feb 2023
